

Caring for Your Forks

A sacred instrument, tended with intention.

I Strike with care

Activate on a silicone puck, or the soft of your palm or knee.
Never strike metal, glass, or stone — it can dull the tone.

II Hold the stem

Cradle the handle, never the tines.
Clean hands keep the resonance pure:

III Cleanse gently

Wipe with a soft, dry cloth after use. If needed, a barely-damp cloth, then dry fully. No chemicals or abrasives.

IV Rest it home

Return each fork to its box — away from heat, moisture,
and any risk of a fall. A drop can alter its true pitch.

*Tended with intention, your Sacred Tones
will sing true for a lifetime.*
